

Sim Jia Zheng

Kuala Lumpur, MY | +6011-64939193 | jjazheng30@gmail.com | github.com/sjz30 | linkedin.com/in/sim-jia-zheng | sjz30.github.io

SUMMARY

Proactive final year Cybersecurity student at Multimedia University (CGPA: 3.27). Combines a strong academic foundation with hands on professional experience in DevOps, web security, and infrastructure management.

WORK EXPERIENCE

IT Security Analyst Intern

Jul 2025 — Oct 2025

Infinitly Digital Solutions and Consultancy

Kuala Lumpur, MY

- Spearheaded a large-scale migration of over 20 WordPress/WooCommerce sites to a new, multi-server environment, handling configurations for PHP-FPM, MySQL, SSL, and caching to optimize performance.
- Restored 100% of client sites within 24 hours by contributing to a critical incident recovery and rollback process following a server cluster failure.
- Strengthened infrastructure security by deploying a containerized mail server with Docker and implementing robust email authentication. Enhanced DNS security by configuring DNSSEC and Cloudflare WAF.

SKILLS

- **Programming & Scripting:** Python, Bash, PowerShell, C++, Rust, Go, SQL
- **Security:** Burp Suite, Nmap, Wireshark, Metasploit, Nessus, Ghidra
- **DevOps & Automation:** Docker, Kubernetes, Terraform, Ansible, Jenkins, GitLab CI, Git
- **OS & Infrastructure:** Linux, Windows Server, Virtual Machines (HyperV, QEMU), Nginx

PROJECTS

Student Management System with Database Security | Vue.js, Windows Server, SQL Server, Terraform, AWS

- Engineered a Student Management System implementing Row-Level Security (RLS), Dynamic Data Masking, and Transparent Data Encryption (TDE) to ensure strict data segregation.
- Designed a secure and highly available AWS architecture with Terraform. Deployed the system in EC2 and encrypted RDS storage. Implemented AWS IAM, WAF, CloudTrail, and CloudWatch for security.

FYP: Damaged Barcode Recovery and Forensics Toolkit | Python, Flet, SQLite

- Developed a offline, cross platform forensics GUI application to recover barcodes and matrix codes via image processing and interactive manual restoration process with integrity scoring, tampering detection.

Cryptographic Cipher Visualization Tool | Python, PySide6 (Qt)

github.com/sjz30/cipher

- Developed a GUI application to encrypt, decrypt, and visualize the processes of the Playfair and Rail Fence ciphers.

EDUCATION

Multimedia University

Mar 2023 — Sep 2026

Bachelor's of Computer Science (Cybersecurity)

Cyberjaya, MY

- Cumulative GPA: 3.27/4.0
- Dean's List - Oct/Nov 2024
- Relevant Coursework: Database and Cloud Security, Network Security, Ethical Hacking & Penetration, Cryptography and Data Security, Digital & Computer Forensics, Operating Systems

EXTRACURRICULAR ACTIVITIES

Competitive Programming Competitions

- Team Lead - CodeNecton 2022, 2023, 2024
- Solved algorithmic problems focusing on data structures and dynamic programming using Python and secured a Top 10 finish among 50+ competing teams.

OTHER

- **Languages:** Mandarin, English, Bahasa Malaysia, Cantonese
- **Hobbies and Interests:** Chess, Swimming, Drone Racing
